QUAYLE ACTION

1. This application is in condition for allowance except for the following formal matters:

In claims 11-13, it appears that the phrase "or the other planar circuit geometries", should read as --or inverted/suspended microstrip line geometries-- to make the phrase more clear.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1-17 are allowed.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

How (US 6,483,393) teaches a nonreciprocal resonator.

3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not teach the claimed invention including an outer feeder network consisting of an N-fold binary divider showing a circular symmetry coincident with the nonreciprocal resonator and an inner feeder network consisting of a radial branch having M branch arms with the particular claimed configuration.
